- Light weight, comfortable head mounted goggles with adjustable strap and only weighs 12 ounces.
- Keeps your hands free, goggles flip up to get back to natural sight.
- Compact, convenient, and easy operation.
- Unlike other night vision gear (generation I, II or III), NYTE VU allows you to connect additional video devices to the goggle for either displaying (video in) or recording (video out) of your view.
- Is not damaged by bright light or day light as traditional night vision goggles can be.
- The goggle eye piece screens give a broad 22 degrees of viewing area.
- CCD camera is specially designed using a Sony™ imager along with non visible Infrared LED lights to give leading edge night vision technology.
- Life size display, gives a true perspective 1 to 1 view, allowing for ease of walking with the goggles on.
- On-unit volume control, brightness control, and contrast control.
- Fit with eye glasses.

### Many Uses

- **Outdoor Activities** - night hunting, viewing wildlife at night, walking in and out to tree stand, night fishing, night paintball, cross country skiing, walking, sailing/boating, and snowshoeing.
- **Law enforcement** - where night activity needs to be seen undetected and the video recorded for later use.
- **Wildlife and University Research** - view and record animals at night with out spooking.
- **Industrial Applications** - inspecting tanks, dryer cans, mining applications. Optional underwater camera and extension pole camera.
- **Security Industry** - for security guards when making rounds or for observation from guard house and vehicles.
- **Home Security** - Observe an intruder outside your home or property with out being noticed.
- **Other Applications** - using the video in feature along with supplied stereo ear phones to watch movies connected with home DVD, VCR players, car DVD players or portable DVD players. Play games connected with PlayStation, Xbox, or game cube.
- **Handling and Fixing Equipment** - goggles frees hands to work in complete darkness.
